

PACING WHEEL

Use the Pacing Wheel to create estimated times to assist in planning and delivering instruction for your class. We have inserted the bell ringer, check for understandings, and the exit ticket components with their times on the pacing wheel for your convenience. These components should be standard in every lesson. Depending on the time allotted for the class, feel free to eliminate one of the CFU items.

Subtract 23 - 31 minutes from the total amount of time you have for your class. The remaining balance is how much time you have left to teach. Use the remaining to plan your direct teaching and accompanying activities.
